Total Appointments	3596	42	353	571	488	88	211	503	516	501	118	204	1

This report is based only on Attended appointments.

Normally this report is run for an entire year with the start date being the start date of the year.

For New and Returning Unique Clients the report only counts the first appointment for each client in the specified date range.

For New and Returning Unique Clients each client is only counted once on the report. (Either as New or Returning).

New Client versus Returning status is based on if they have any appointments from before the specified Start date.

If you change the Start date the New and Returning monthly totals can both change.

For example if you had only one client and they had appointments in September and October. If you ran the report starting in September there would be 1 Unique New Client in September and 0 Unique clients in October. If instead you ran the report starting in October then the report would show 1 Unique Returning Client in October.
